

Candidate

Executive Council of the International Society for the Advancement of Emergy Research

Term Length (4)

Pier Paolo Franzese

Department of Science and Technology, Parthenope University of Naples, Italy

E-mail: pierpaolo.franzese@uniparthenope.it

Short CV

Pier Paolo Franzese graduated with honours in Environmental Sciences in 2002. In 2006, he achieved the international title of Ph.D. in “Crop Systems, Forestry, and Environmental Science” with label of Doctor Europaeus.

Since 2006, Dr. Franzese holds a permanent position as Senior Researcher in Ecology at the Department of Science and Technology of Parthenope University of Naples, Italy. At the same University, since 2008, he also holds the title of Aggregate Professor of Environmental Accounting and Assessment.

Over the last ten years his research and teaching activities have been focused on environmental accounting and environmental assessment, and their application to the development of an ecosystem approach for studying human-environment interactions. Since 2006, he regularly teaches a course on emergy accounting in the framework of the Master Programmes in Environmental Sciences and Biological Sciences.

Dr. Franzese is founder Member and scientific Secretary of the International Ph.D. Programme “Environment, Resources and Sustainable Development” hosted at Parthenope University of Naples where he also founded and directs the Laboratory of Ecodynamics and Sustainable Development.

He is Editor of the Elsevier journal Ecological Modelling for the subject “Environmental Accounting models”. In addition, he is also Member of the Editorial Boards of the following international journals: Energy, Ecology and Environment (Springer), Ecological Questions (NCU), and Journal of Environmental Accounting and Management (L&H).

Personal Vision Statement for the Emergy Society (ISAER)

In my opinion, the most important priorities for advancing ISAER’s mission over the next 4 years are:

- Continuous standardization of the emergy accounting method.
- Exploring integration and synergistic use of the emergy method and other methodologies of environmental accounting. In my opinion it is important to boost a positive dialogue with the practitioners of other environmental accounting methods worldwide.
- Establishment of a publications committee.
